

Application for Management Consulting internship position at PwC

Dear Recruitment Manager,

I am a penultimate year Engineering student at the University of Warwick and hereby write to apply for the Management Consulting internship.

Over the years I have undertaken several internships in world class companies completing numerous projects where I thoroughly enjoyed gaining extensive business, problem solving and analytical skills thus igniting my interest in consulting. The values PwC hold greatly resonate with me from diversity and inclusion to the nurturing of all personnel from junior to senior level. I believe PwC has the most exhilarating learning venture where I can make a positive impact and grow with many aspiring individuals.

I am eager to apply for the Management Consulting internship due to PwC's rich heritage and the possibility of working with PwC's industry leading clients is extremely exciting. Having excelled in my role at Advanced Medical Solutions, I developed tremendously across all business functions through cross-team collaboration on multiple projects. I assisted M&A team to provide synergy and risk analysis on vertical acquisitions by synthesising essential data into valuable insight. I collaborated with commercial team to enhance business growth for surgical line targeting new clients and market opportunities worldwide. I was also heavily involved in a preventative maintenance project where I built and assisted implementing a complex downtime model. This intense learning opportunity truly honed my analytical skills and ability to present concise information regarding strategic intervention which is essential when working on cases with clients.

As President and Captain of the University badminton team I devoted myself to improve the standard. I liaised with 50 performance team members regularly to relay proposals to coaches and assess finances with treasurer. I proposed and implemented a very successful 'development team' with the Athletic Union by coordinating different executive teams to liaise with Student Union. I designed detailed tailored plans for each player resulting in sharp improvements with 4 performance teams being promoted which was a revolutionary feat. Throughout this role my leadership, communication and project management abilities improved immensely. I was able to truly appreciate comradery and teamwork understanding everyone's individual qualities and specialties giving me new perspectives on leading my team under great pressure which I can utilise at PwC.

I have long established a deep-rooted desire in consulting and wish to grasp this opportunity as I believe PwC is unparalleled in environment and support. Along with all the invaluable experience I have amassed, I am also a very enthusiastic and organised student with an achieving mindset, I am confident that I can be an asset to you and would greatly appreciate the opportunity to join your remarkable team. I hope you would take my application into consideration, thank you for your time and I look forward to hearing from you.

Yours Faithfully,

Kieran Tsang
